

MARÍA
SANCHO
CENTRO DE PSICOLOGÍA

If you are starting your career as a psychologist, this is your first step.

CLINICAL AND PRACTICAL INTERNSHIPS

2023

Our Center

The Psychology Center - María Sancho is formed by professionals specialized in children, adolescent, adult and family therapy. With more than 1,000 annual visits, and 70+ active patients at the moment, it is a reference center in the area.

It has been awarded with the certificate of excellence in 2019, 2020, 2021 and 2022, with an average rating of 5 stars by patients.

In addition to the clinic, they have a research area with numerous scientific publications and an area for teaching and training young psychologists.

Training and internships

Our center has been collaborating with the most prestigious universities in Spain in a clinical training and internship program, made by psychologists for psychologists and personalized individually for each student.

For a few months the students are part of our team, sharing and learning about all areas of clinical psychology through training and experience with real patients.

A PERSONALIZED PROGRAM

Together we will create an individualized training plan for you, with the aim of improving your skills and abilities as a therapist and promoting your development at a theoretical and practical level in the areas that interest you the most.

In addition, you will have direct access to your tutor when you need to, and a WhatsApp group with other students to stay connected and share the experience together.

CO-THERAPY

You will have the opportunity to participate in the therapeutic processes of real patients, entering the sessions and experiencing first-hand the reality of the profession. You will learn how to evaluate, conceptualize cases and work with all types of problems and in different populations: children and adolescents, adults, families... etc

THEORETICAL TRAINING

You will have the opportunity to receive specific classes on the relevant clinical psychology topics that best suit your preferences to promote your development according to your personalized plan (e.g. attachment, trauma, eating disorders, neuropsychological assessments, etc.).

CASE TUTORIALS

The psychologists will present you with the clinical cases they are dealing with at that time.

You will be able to accompany them in the process and learn about how they evaluate patients, state hypotheses, conceptualize the case, set goals and design the intervention programs, closely following their evolution.

But this isn't all..

CASE SUPERVISION

You will actively participate in the team's case supervision. Different cases and challenges of both therapists and students will be shared in order to seek a constructive vision among all, in an environment of debate and reflection.

INDIVIDUAL WORK

Your tutor will ask you to carry out exercises in order to encourage your training and your therapeutic skills: report preparation, study of topics that are relevant for the development of your professional practice, case preparation... etc.

*These will be flexible and will be adapted to the preferences and availability of each of the students taking into account their personalized plan.

METHODOLOGICAL TUTORIALS

You will have the opportunity to meet with your tutor to monitor your progress according to your personalized plan, solve any doubts that may arise and develop your learning to the maximum.
